OIL SHALE  ○  COAL  ○  OIL SANDS

VOLUME 26 - NUMBER 2 - JUNE 1989

QUARTERLY

© THE PACE CONSULTANTS INC.
Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company's experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.
CONTENTS

HIGHLIGHTS

I. GENERAL

CORPORATIONS

New Zealand Synfuels Achieves New Record Production 1-1

GOVERNMENT

ACS Urges Increased Funding for Energy Research 1-3
New DOE Chief Pushing for New Energy Plan 1-3
California Biennial Energy Report Sees Need for Alternative Fuels 1-4

ENERGY POLICY AND FORECASTS

New GRI Baseline Projection Slight Coal Gasification 1-6
Transportation Research Board Looks at Transportation in 2020 1-9
New EIA Long-Term Forecast Lowers Expected Prices for Oil 1-10
Federal Reserve Bank Predicts High Oil Prices by 2000 1-14
World Bank Report Shows Strong Upturn for Oil in the 1990s 1-16

ECONOMICS

Methanol said Unattractive as a Gasoline Substitute 1-18

INTERNATIONAL

Canadian Peat Conversion Plant Planned 1-22
EC to Develop Internal Energy Market for 1992 1-22

ENVIRONMENT

Contrarian View Says Earth to Benefit from Increased Carbon Dioxide 1-24
EPA Sets Emission Standards for Methanol Vehicles 1-26

RESOURCE

Recoverable Natural Gas Put at 1,000 TCF for Lower 48 States 1-27

RECENT GENERAL PUBLICATIONS/PATENTS

1-30

COMING EVENTS

1-31
II. OIL SHALE

PROJECT ACTIVITIES

Unocal Lowers Breakeven Point
New Paraho Puts Shale Oil on Highway Test Strips
Petroxix Achieving 94 Percent Operating Factor
Western Slope Refining Meets Environmental Opposition

CORPORATIONS

SPP/CPM Note Encouraging Trends in Oil Shale
CSIRO Continues Oil Shale Research Program

GOVERNMENT

House of Representatives Passes Oil Shale Land Bill

ENERGY POLICY AND FORECASTS

Is the West Crippled by Its Resources?

ECONOMICS

Shale Oil Asphalt Blend a Promising Niche Market

TECHNOLOGY

Texaco Flash Hydroforming Process Gives High Oil Yield
Dry Exhaust Conditioner Tested in Unocal Mine
Beneficiation Reduces Hydrogen Consumption During Hydroforming
Computer Code Simulates Face Ventilation During Blasting
LLNL Finds Effect of Steam on Retorting to be Limited

INTERNATIONAL

Oil Shale Research Institute Marks 30th Year
Canadian Shale Tested by Petroxix
Oil Shale Research Active in China
Brazilian Projects Study Use of Oil Shale Fines
Development Potential of Nova Scotia Oil Shale Assessed

ENVIRONMENT

Salt Movement Through Groundwater Tracked at Anvil Points Site

WATER

Protection Urged for Razorback Sucker in Colorado River
Companies File Water Right Applications in the Piceance Basin

RESOURCE

Utah Oil Shale Leases Issued
Two Nahcolite Mining Projects Under Way on Oil Shale Lands

SOCIOECONOMIC

Effort Stepped Up to Sell Battlement Mesa
Unocal Camp Considered for Prisoners

RECENT OIL SHALE PUBLICATIONS/PATENTS

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS
III. OIL SANDS

PROJECT ACTIVITIES

Wolf Lake Phase 2 Delayed for One Year
Tangleflags Performance Exceeds Expectations
NewGrade Startup Reviewed
Canadian Project Deferrals and Cutbacks Summarized
Amoco Converts to Pattern Steamflood at Elk Point

CORPORATIONS

PanCanadian Results Reflect Increased Oil Sands Holdings
Alberta Energy Company Sets Record Sales
Amoco/Dome Merger Creates Single Company with Giant Oil Sands Interests
Bunger Associates Gets Tar Sands Funding
Westmin Sells Heavy Oil Resources to Norcen
Husky Downsizes Heavy Oil Operations
M.W. Kellogg Regains Rights to FCC/HOC Technologies
Suncor Records Loss, Schedules Cutbacks
Murphy Cuts Back Heavy Oil Operations

GOVERNMENT

ERCB Reports Record Production at Canadian Oil Sands Plants in 1988

ENERGY POLICY & FORECASTS

ERCB Forecasts Strong Growth in Bitumen Production

TECHNOLOGY

Kaolinite in Circle Cliffs Tar Sand Cuts Retorting Yield
Microbubble Flotation Process Patented
Chevron Patents Combined Tar Sand/Coal Upgrading Process
Horizontal Wells Prove Promising in Heavy Oil Projects

INTERNATIONAL

Asphalts and Bitumens Said Plentiful in Turkey
Nigeria to Study Tar Sands
World List of Heavy Crude and Tar Sand Occurrences Published

ENVIRONMENT

Clean-Burning Coal-Fired Boiler to be Installed at Cold Lake

RESOURCE

USGS Summarizes Bitumen-Bearing Deposits of the United States
Alberta Could Make More Oil Sands Leases Available

SOCIOECONOMIC

Bi-Provincial Project Holds Local Opportunity Sessions

RECENT OIL SANDS PUBLICATIONS/PATENTS

STATUS OF OIL SANDS PROJECTS

INDEX OF COMPANY INTERESTS
IV. COAL

PROJECT ACTIVITIES

Energy International Still Struggling, Likely to Miss Tax Credit Deadline
Great Plains Continues Record-Breaking Performance
Char-Fuels Gets State Funds
Calderon Gasification Project Back on Track

CORPORATIONS

Dow Chemical Creates Energy Subsidiary
ETSI Pipeline Awarded Billion Dollars in Damages from Santa Fe
Questar Reports Gasification Activities
Xcel Group Ships Lignite Gasification Pilot Unit to Greece

GOVERNMENT

DOE Issues Solicitation for Clean Coal Technology Round Three
Coal Conversion Projects in Clean Coal Program have Problems
DOE Makes Coal Research Awards to Universities

ENERGY POLICY AND FORECASTS

Clean Coal Technologies Could Present an International Market Opportunity

ECONOMICS

Shell/EPRI Economic Studies on Shell Gasifier Summarized
Chemical Byproducts from GCC Plants Could be Highly Profitable
Systems Study Shows Mild Gasification to be Attractive

TECHNOLOGY

Great Plains Operating Problems Correlated with Lignite Properties
Air Bottoming Cycle for Coal Gasification Patented
Subbituminous Coal Tested in ChemCoal Process
Texas Lignite Tested at Wilsonville

INTERNATIONAL

Very High Ash Coals Gasified in India
P-CIG Process Ready for Scaleup
Gasification Combined Cycle Units Likely to be Built in Denmark
Sasol Shifts Emphasis from Fuels to Chemicals
Shell Coal Gasifier to be Built in the Netherlands
PowerGen and British Coal May Work on Combined PFBC/GCC System

ENVIRONMENT

Texaco Gasifier Processes Wastes
Environmental Tests Completed on Shell Gasification Effluents

RESOURCE

Permitting Under Way for New PRB Mine
Court Upholds Powder River Coal Leases
NCA Long-Term Forecast is Billion Tons/Year by 1995
Powder River Regional Coal Team to Meet

SOCIOECONOMIC

Crow Tribe Offers Settlement in Coal Tax Case

RECENT COAL PUBLICATIONS/PATENTS
