OIL SHALE  O  COAL  O  OIL SANDS

VOLUME 26 - NUMBER 4 - DECEMBER 1989

QUARTERLY

© THE PACE CONSULTANTS INC.
Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company’s experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.
CONTENTS

HIGHLIGHTS

I. GENERAL

CORPORATIONS

IGT Notes Synthetic Fuels Research Efforts 1-1
ORNL Sets Up Center for Global Environmental Studies 1-3

GOVERNMENT

DOE Warns of Deteriorating Domestic Oil and Gas Production 1-5
DOE Makes New Round of Phase I Awards in SBIR Program 1-5
New SBIR Solicitation Targets Synfuels Technologies 1-8
National Energy Strategy Hearings Chug Along 1-10

ENERGY POLICY AND FORECASTS

EIA Short-Term Outlook Sees Rapid Decline in U.S. Oil Production 1-11
EIA Records Drop in Oil and Gas Reserves for 1988 1-12
EEPC Lowers Oil Price Projections But Still Expects Much Higher Prices 1-13
NERC Says Reliability of U.S. Electric Generating System Will Fall 1-16
World Oil Price to Peak in 2004 1-18
IEW Poll of Price Forecasters Shows Increase for First Time in 8 Years 1-18

ECONOMICS

Economics of the Greenhouse Effect Explored 1-20

INTERNATIONAL

BP Statistical Review Demonstrates Increasing World Energy Demand 1-25
European Community Will Continue to Face Energy Challenges 1-26

ENVIRONMENT

CO2 Injection Could Make Hydrogen from Fossil Fuels Acceptable 1-30
Global Warming Study Panel Formed 1-32
Idso Book Puts Geologic Perspective on Carbon Dioxide Greenhouse Effect 1-32

COMING EVENTS

1-36
II. OIL SHALE

PROJECT ACTIVITIES
Western Slope Refining’s Environmental Problems Continue

CORPORATIONS
Ramex Diversifies In Search for Operating Income
Unocal Touts Future of Oil Shale
New Paraho Completes Six Shale Oil Asphalt Test Strips
LLNL Envisions 100 TPD and 1,000 TPD Pilot Plants

ECONOMICS
Fluidized Bed Retorting of Eastern Oil Shale Feasible at Less Than $35/BBL
Oxy Thinks Fluid Bed Combustion Will Improve Oil Shale Economics

TECHNOLOGY
Unocal Improves Drilling Technology
Superiority of Shale Oil Asphalt Demonstrated In Lab Tests
LLNL Reviews Progress In Oil Shale Technology
Spent Shale Tested as Pavement Subgrade Stabilizer

INTERNATIONAL
Oil Shale Resources Present In Arab Countries
USSR Shale Tar Distillation Practices Detailed
Israel Nears Completion of Oil Shale Combustion Unit

ENVIRONMENT
Environmental Monitoring Shows Improving Performance at Parachute Creek

WATER
Recovery Plans Issued for Endangered Colorado River Fish
Shell Western Files for Change of Water Rights

RESOURCE
BLM Recommends Against Wilderness Designations Near Oil Shale Region
Oil Shale Lease Assigned to Cliffs
Marathon Files Suit Over Portland Claims

SOCIOECONOMIC
Reverse Boomtown Effects Chronicked
Data Base System Monitors Impacts of Alternative Fuels Development

RECENT OIL SHALE PUBLICATIONS/PATENTS

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS
III. OIL SANDS

PROJECT ACTIVITIES

Oil Mining Project Set for Louisiana 3-1
Caribou Lake Pilot to Proceed 3-2
Husky Expands Lloydminster Area Steam Project 3-2
Site Work Under Way for Biprovincial Upgrader 3-2
Three Star Oil Mine Abandons Snake Pattern Drilling Technique 3-3
NewGrade Upgrader Passes First Year of Operation 3-3
OSLO Carrying Out Diversified R&D Program 3-4

CORPORATIONS

BP Canada Wants to Sell Wolf Lake 3-5
Tar Sands Drilling Proposed in Whiterocks Canyon 3-5
C-II Dredging Project to be Extended 3-5
Improved Results at Suncor Buoy 3rd Quarter Profits at Sun 3-5
Taciuk Processor Gets Waste Cleanup Job 3-6
AOSTRA Publishes New Oil Sands Handbook 3-6
Canadian Energy Developments Promoting 28,000 BPD Coprocessing Facility 3-7
AOSTRA Reviews Oil Sands Development Program 3-7

GOVERNMENT

Alberta May Sell Interest In Syncrude Plant 3-12
Alberta Energy Minister Optimistic On Upturn for Heavy Oil and Oil Sands 3-12

ENERGY POLICY & FORECASTS

CERI Predicts Rising Oil Imports for Canada 3-15
Outlook for Tar Sands and Heavy Crudes Clouded by New Environmental Concerns 3-16

ECONOMICS

Wide Variations In Production Costs Pound for In Situ Bitumen Projects 3-18

TECHNOLOGY

Kentucky Tar Sand Bitumen Tested In Coprocessing Mode 3-22
CANMET Hydrocracking Process Continues to Advance 3-24
Equipment Choices Defined for Solvent Extraction of Tar Sands 3-26
Model Results Good for Electric Preheat Process In Athabasca Oil Sands 3-28

RESOURCE

Asphalt Ridge Tar Sands Unit Terminated 3-31
ACECs Identified for Diamond Mountain Resource Area 3-31

RECENT OIL SANDS PUBLICATIONS/PATENTS

3-33

STATUS OF OIL SANDS PROJECTS

3-36

INDEX OF COMPANY INTERESTS

3-61
IV. COAL

PROJECT ACTIVITIES

Frontier Energy Project Will Use CCLC Coprocessing Technology
Peabody CCT Project Based on IGT Mild Gasification Process
Midland Cogeneration and California Carbide Propose High-Temperature Flash Gasification
M-C Power Proposes Coal Gas Fired Fuel Cell Demonstration
Geneva Steel to Demonstrate Gasifier-Based COREX Ironmaking Process
Air Products and Dakota Gasification Team Up for Liquid Phase Methanol Demonstration
Byproduct Development Efforts Continue at Great Plains Plant
Calderon Applies for Third Round CCT Funding
WRI Starts Up New-Design Mild Gasifier

CORPORATIONS

SGI and Shell Form TEK-KOL, ENCOAL and Other Units to Develop LPC Process
Tampella Licenses U-GAS Process
GRI Phases Out Coal Gasification Efforts
Texaco to Buy Cool Water, Use It to Burn Sewage Sludge

GOVERNMENT

Energy Secretary Promises to Expedite Clean Coal Program
Clean Coal Technology Projects Shift Westward

ENERGY POLICY AND FORECASTS

Research Needs Assessment Panel Points Way for Liquefaction Research

ECONOMICS

SASOL Economic Performance Linked to Byproducts

TECHNOLOGY

Exxon Studying Catalytic Hydropyrolysis
Electrochemical and Electrothermal UCG Process Proposed
Hydrocarb Process Could Produce Clean Fuels from UCG
HYCOL Pilot Plant Described

INTERNATIONAL

Coal Conversion and MHD Projects Under Way In USSR
Progress Made on CIVOGAS Process In Brazil
Coal Gasification Cheaper Than Imported Natural Gas In East Germany
Extensive Chinese Coal Gasification Efforts Summarized

ENVIRONMENT

Final EIS Issued for Clean Coal Technology Program
BLM Recommends No Wilderness Designation In Montana Powder River Area

RESOURCE

IEA Projects Demand for Coal to Rise 33 Percent by 2000
Black Thunder Mine Nears 25 Million Tons Output

SOCIOECONOMIC

PEB Supplemental EIS Predicts Severe Socioeconomic Impact on Cheyenne Tribe
