PACE SYNTHETIC FUELS® REPORT

OIL SHALE ○ COAL ○ OIL SANDS ○ NATURAL GAS

VOLUME 28 – NUMBER 4 – DECEMBER 1991

QUARTERLY

© THE PACE CONSULTANTS INC.
Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company's experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.
CONTENTS

HIGHLIGHTS

I. GENERAL

CORPORATIONS

CSIRO Continues Strong Liquid Fuels Program

GOVERNMENT

DOE Fossil Energy Budget Holds Its Ground
New SBIR Solicitation Covers Alternative Fuels
USA/USSR Workshop on Fossil Energy Held

ENERGY POLICY AND FORECASTS

Politics More Important than Economics in Projecting Oil Market
Study by Environmental Groups Suggests Energy Use Could be Cut in Half
OTA Reports on U.S. Oil Import Vulnerability
Energy Secretary Decrees Failure of Energy Strategy Bill
BP Statistical Review Notes Lack of Growth in World Energy Reserves and Use

TECHNOLOGY

Flexible Fuel Conversion Plants Proposed

INTERNATIONAL

Continuation of Australian Energy Exports Recommended

COMING EVENTS

II. OIL SHALE

PROJECT ACTIVITIES

Stuart Project has Definitive Construction Cost Estimate
Northlake Industries Demonstrates Shale Extraction Process

CORPORATIONS

Paraho Announces Loss for Year

GOVERNMENT

BLM Developing Resource Management Plan for White River Area
MTCI Wins SBIR Grant for Oil Shale Retorting

SYNTHETIC FUELS REPORT, DECEMBER 1991
ECONOMICS

Paraho Projects 30 Percent Return on Shale Oil Asphalt
Use of Spent Shale in Cement Manufacture Offers Economic Benefits

TECHNOLOGY

Amoco Patents Shale Oil Syncrude Dedusting Process
Fifty Pound Per Hour Cold Flow Tests Carried Out on Kentort Design

ENVIRONMENT

Creation of Low Permeability Layers Could Retard Leaching from Shale Files

WATER

Unocal Files for Water Rights

RESOURCE

Moratorium Put on Patenting of Oil Shale Lands
Proposal Made to Lease Naval Oil Shale Reserve for Gas Development
NaTec Resources Producing Nahcolite in the Piceance Basin

OIL SHALE PUBLICATIONS/PATENTS

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS

III. OIL SANDS

PROJECT ACTIVITIES

OSLO Winding Down
Biprovincial Upgrader Requires Additional Funds
Suncor Reports Earnings Increase, Record Oil Sands Production
Oil Sands Production Figures Updated

CORPORATIONS

Solv-Ex Still Looking for Financing for Bitumount Project
Nova to Sell Husky
Imperial Considering Heavy Oil Upgrader
Petro-Canada Sells Part of Syncrude Interest to Mitsubishi
Murphy Cites Favorable Heavy Oil Results with Horizontal Drilling

GOVERNMENT

DOE Calls for Advanced Oil Recovery Proposals
ERCB Issues Orders and Approvals in Oil Sands Areas
ENERGY POLICY AND FORECASTS

National Energy Board Predicts Increasing Bitumen Production
UNITAR Director Notes Importance of Heavy Oil and Tar Sands

TECHNOLOGY

Clean Coal Technology May Find Use in Heavy Oil Applications
Horizontal Wells Becoming Viable for Heavy Oil and Tar Sands
VCC Technology Ready for Commercialization

INTERNATIONAL

Nigeria Tar Sands May be Developed
Orimulsion Making Progress in European Markets
AOSTRA Annual Report Outlines International Efforts in Heavy Oil and Oil Sands
Soviet Production of Natural Bitumen and Bituminous Rocks Covers 20 Years
Orimulsion Tested in Italy and Florida

ENVIRONMENT

Taciuk Process Finds New Environmental Applications

OIL SANDS PUBLICATIONS/PATENTS

STATUS OF OIL SANDS PROJECTS

INDEX OF COMPANY INTERESTS

IV. COAL

PROJECT ACTIVITIES

Wabash River Project Will Demonstrate Coal Gasification Repowering
CTC to Test Char in Electric ARC Furnace
ENCOAL on Schedule for Startup in First Half of 1992
Preliminary Design for Combustion Engineering IGCC Project to be Finished Next Year
MTCI Indirect Gasifier Yields High Hydrogen Concentration
Production at Great Plains Continuing at High Level
TECO Energy Relocates Round 3 IGCC Project
Eastman Expands Chemicals from Coal

CORPORATIONS

UCG Project Proposed for Pennsylvania Anthracite Region
Joint Research Teams Attack Oil from Coal Challenge
Status of CCT Projects Updated
SGI Activities Multiply
DGC Shows $10 Million Profit in 1990
GOVERNMENT

Nine New Clean Coal Projects Selected
DOE Tells Congress No Additional Work Needed on Coal Refineries
CCT Round 5 Delayed
Two SBIR Grants Given for Coal Liquefaction

ENERGY POLICY AND FORECASTS

CERI Sees Big Role for IGCC in Canada

ECONOMICS

Mild Gasification to Produce Formcoke in Pennsylvania Shows Promise
Economic Impact of Coal in Canada Assessed

TECHNOLOGY

ENCOAL Solid Product Shows Favorable Combustion Properties
Vortex Fluidized Bed Gasifier Under Development
Advantages Seen for COREX Process
Direct Coal-Fired Gas Turbine Tested
Coal Hydrogen Controls Catalyst Deactivation in HRI Coprocessing

INTERNATIONAL

IGCC Based on Biomass and Peat Under Study in Finland
China Plans More Coal Gasification Plants
SASOL to Expand Chemicals Production
200 TPD IGCC Pilot in Operation in Japan

ENVIRONMENT

CIAB Sees Opportunity to Reduce Carbon Dioxide Emissions from Coal

SOCIOECONOMIC

BLM Affirms Montana Leases with Cultural Stipulations

COAL PUBLICATIONS/PATENTS

STATUS OF COAL PROJECTS

INDEX OF COMPANY INTERESTS

V. NATURAL GAS

PROJECT ACTIVITIES

New Zealand Synfuels Produces Record 6-Month Output
GOVERNMENT

DOE Outlines Proposals to Help Gas Industry
Gas-Fired Liquefier Gets SBIR Award

ECONOMICS

Liquid Fuels from Natural Gas Should be Competitive at Oil Prices of $25 to $30

TECHNOLOGY

Exxon Develops New Process for Synthetic Liquids from Gas
New Method Discovered for Converting Methane to Higher Alkanes

INTERNATIONAL

Gas Production and Reserve Additions Up in 1990

STATUS OF NATURAL GAS PROJECTS
