OIL SHALE  ○  COAL   ○  OIL SANDS   ○  NATURAL GAS

VOLUME 29 – NUMBER 3 – SEPTEMBER 1992

QUARTERLY

© THE PACE CONSULTANTS INC.
Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company's experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.
CONTENTS

HIGHLIGHTS

A-1

I. GENERAL

GOVERNMENT

DOE Announces SBIR Grants in Fossil Energy

1-1

ENERGY POLICY AND FORECASTS

Conoco World Energy Outlook Promotes Diversification of Energy Sources

1-4

U.S. Environmental Laws Will Reduce Refining Capacity, and Open the Door to Alternative Fuels

1-10

LLNL Rates Importance of Different Technologies for Energy Security

1-11

TECHNOLOGY

MTCI Patents Pulse-Tube Gasifier for Wide Variety of Feedstocks

1-16

INTERNATIONAL

Outstanding Opportunities Seen for Energy Investments in Russia and the Republics

1-19

RESOURCE

Uinta Basin is America's Energy Storehouse

1-20

GENERAL PUBLICATIONS/PATENTS

1-21

COMING EVENTS

1-22

II. OIL SHALE

PROJECT ACTIVITIES

LLNL Reports HRS Pilot Plant and Modeling Results

2-1

GOVERNMENT

DOE Solicits Shale Oil Value Enhancement Research

2-4

ENERGY POLICY AND FORECASTS

Declining Oil Shale Output Forecast for Estonia

2-5

ECONOMICS

Report for Occidental Says Shale Oil Native Products Extraction is Feasible

2-7

Use of Retorted Devonian Oil Shale to Make Cement Appears Practical

2-9

SYNTHETIC FUELS REPORT, SEPTEMBER 1992
TECHNOLOGY

Amoco Patents Process for Acid Treatment of Kerogen-Agglomerated Oil Shale
Biotechnological Process for Upgrading Shale Oil Patented
Solid Substrate Affects Coking of Hot Shale Oil in KENTORT Reactor
Combustion Kinetics of Retorted Western Oil Shale Resolved
Shale Ash-Layer Thickness Measured
Unocal Patents Process and Catalyst for the Dewaxing of Shale Oil

INTERNATIONAL

Pollution Problems at Estonian Oil Shale Powerplants Outlined

RESOURCE

House Version of Energy Strategy Bill Includes Prohibition on Oil Shale Land Patents

SOCIOECONOMIC

Unocal Money Will Train Former Workers

OIL SHALE PUBLICATIONS/PATENTS

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS

III. OIL SANDS

PROJECT ACTIVITIES

Burnt Lake Project Recovering Cold Lake Bitumen Without Steam
Bi-Provincial Upgrader Encounters Big Cost Overruns on Way to November Startup
Oil Sands Production Figures Updated
Suncor Targets $0.50 per Barrel Decrease in Operating Costs for This Year
China National Petroleum Corporation Joins UTF Project

CORPORATIONS

Amoco Canada to Rely More on Heavy Oil
AOSTRA Oil Sands and Heavy Oil Commercial Successes Updated

GOVERNMENT

DOE Picks 14 Winners in First Phase of New EOR Program
ERCB Issues Orders and Approvals in Oil Sands Areas

ENERGY POLICY AND FORECASTS

New Refinery Capacity Will be Needed for Heavy Oil and Bitumen
New CERI Analysis Projects Declining Production of Crude Oil in Alberta

ECONOMICS

In Situ Recovery Should Complement Open Pit Mining in Athabasca Deposit
TECHNOLOGY

MTBE Proposed as Carrier for Bitumen Transport and Viscosity Reduction 3-21
Computer Simulation Yields Insights on Steam/Foam Injection in Athabasca Tar Sands 3-22
History of South Belridge In Situ Combustion Reviewed 3-24
Quality of Products During In Situ Combustion Analyzed with New Tool 3-26
Electric Preheating for SAGD Process Modeled 3-28
Chevron Patents Combined HASdrive and In Situ Upgrading Process 3-29
Shell Patents Electrical Preheat Steam Assisted Gravity Drainage Process 3-30

INTERNATIONAL

PDVSA Continues to Line Up Foreign Partners for Heavy Oil Development 3-33
Nigerian Bitumen Study Planned 3-33
Texaco Gasifier Selected for Two Gasification Projects in Italy 3-33
Texaco and Bior America to Promote Gasification of Orimulsion 3-33
Japanese Activities and Points of View in Oil Sands Summarized 3-34

ENVIRONMENT

Progress Being Made in Solving the Fine Tails Problem 3-37

OIL SANDS PUBLICATIONS/PATENTS

3-39

STATUS OF OIL SANDS PROJECTS

3-42

INDEX OF COMPANY INTERESTS

3-67

IV. COAL

PROJECT ACTIVITIES

Louisiana Gasification Observes Fifth Anniversary 4-1
ENCOAL Project in Startup—Not Affected by Sale of Shell Mining Company 4-1
DOE Approves Shift of Tallahassee Clean Coal Project to Pennsylvania 4-1
Toms Creek Project Hits Roadblock 4-2
Texaco Gasifier Selected for Tampa IGCC Project 4-2
Wyoming Turns Down Char-Fuels Request for More Money 4-3
CarbonDry Process Headed for Pilot Demonstration 4-4

CORPORATIONS

Custom Coals Lines Up Financing 4-6
M-C Power Achieves Fuel Cell Scale-Up 4-6
Energy International Sees Promise in Underground Gasification 4-7

GOVERNMENT

DOE Completes Agreements on Two Gasification Projects 4-10
DOE Issues Solicitation for Clean Coal Technology Round V 4-10
DOE Names University Coal Research Winners 4-11

ENERGY POLICY AND FORECASTS

Late 90s Will be a Key Period for Gasification Technology 4-13
DOE Outlook for Direct Liquefaction is Optimistic 4-15
ECONOMICS

WRI CompCoal Process Looks Feasible

TECHNOLOGY

Technology of Drying Low-Rank Coals Reviewed
Second Law Analysis Shows BGL Gasifier to be the Most Efficient
British Coal Topping Cycle Shows Promise
Simulated Coal-Derived Methanol Tested in Diesel Engine
Nippon Kokan Patents Two-Stage Gasifier
Best Method of Extracting Air From Turbines for IGCC Cycles Being Researched
Coprocessing of Coal and Used Tires Shows Promise
Solid-Phase Coal Refining May Lead to New Products
IGOR Process for Coal Liquefaction Described

INTERNATIONAL

SGI Studying Coal Refineries in Southeast Asia
Coal Gasification to Contribute to Environmental Cleanup in Chinese City

COAL PUBLICATIONS/PATENTS

STATUS OF COAL PROJECTS

INDEX OF COMPANY INTERESTS

V. NATURAL GAS

ENERGY POLICY AND FORECASTS

Worldwatch Institute Sees Natural Gas as a Bridge to Clean Energy

TECHNOLOGY

Exxon Natural-Gas-To-Liquids Process Revealed

RESOURCE

Hydrates Could be Huge Source of Natural Gas in Alaska

STATUS OF NATURAL GAS PROJECTS
