Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company’s experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.

THE PACE CONSULTANTS INC.
SYNTHETIC FUELS ANALYSIS

MANAGING EDITOR

Jerry E. Sinor

CONTENTS

HIGHLIGHTS

I. GENERAL

GOVERNMENT

United States Passes Comprehensive Energy Bill 1-1
New SBIR Solicitation Covers Alternative Fuels 1-3
DOE Selects Projects for Phase II SBIR Research Grants 1-5

ENERGY POLICY AND FORECASTS

BP Review of World Energy Notes Slight Increase in Energy Consumption 1-7
MIT Study Concludes That Oil Price Forecasts are Biased on High Side 1-8
NERA and CERI Project 1993 Oil Prices of $20 Per Barrel 1-11

TECHNOLOGY

Borehole Mining Not Successful to Date, But May Still Have Potential 1-14

ENVIRONMENT

Advanced Technology Will Not be Enough to Reduce Greenhouse Emissions 1-16

COMING EVENTS

II. OIL SHALE

PROJECT ACTIVITIES

Southern Pacific Reports Progress on Stuart Project 2-1
Paraho Again Producing Shale Oil 2-1
Petrosix Commercial Module Runs at Design Capacity 2-2
Unocal May Turn Project Building Into Hunting Lodge 2-4
Rio Blanco Closes Denver Office 2-4
Conversion of Unocal Shale Oil Upgrader to Methanol Production Planned 2-4

CORPORATIONS

Ramex to Return to Laboratory Work on its In Situ Shale Gasification Process 2-5
Joint Venture to Have 100,000-Ton Capacity for Bicarbonate From Oil Shale Basin 2-5

GOVERNMENT

BLM Solicits Interest in Lease of White River 2-6
National Oil Shale Database to be Published on Compact Disk 2-7
DOE Tiger Team Assesses Management of Naval Oil Shale Reserves 2-8
TECHNOLOGY

Asphalt Additive Produced From Hydrotreated Alabama Shale
Stability of Shale Oil Reviewed
Kinetics of Drying Australian Oil Shale Studied
Column Flotation of Alabama Oil Shale Achieves 60 Percent Carbon Grade
Oxidized Shale Catalyzes NO₂ Removal

INTERNATIONAL

Oil Shale Development in Morocco Suggested
Oil Shale Research in Turkey Reviewed
Different Thermal Conductivity of Fushun and Estonia Shale Affects Processing
Waste Materials of Israeli Combusted Oil Shale Classified as Hazardous in Tests
New Process Developed for Extraction of Alkyl Resorcinols From Kukersite Tar Water
Chinese Shale Oils Analyzed

RESOURCE

New Laws and Regulations Affect Unpatented Oil Shale Mining Claims

OIL SHALE PUBLICATIONS/PATENTS

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS

III. OIL SANDS

PROJECT ACTIVITIES

Suncor Announces Restructuring and Operating Changes
Syncrude Plans Expansion
Imperial to Re-Start Cold Lake Expansion
Agreement Reached on Funding Upgrader Cost Overrun
Syncrude Will Process Bitumen From Underground Facility
Oil Sands Production Figures Updated

CORPORATIONS

Shell Buys Oil Sands Interests
Occidental Joint Venture to Explore Heavy Oil Production in Russia

GOVERNMENT

Alberta Makes Changes in Royalty System
ERCB Issues Orders and Approvals in Oil Sands Areas

ENERGY POLICY AND FORECASTS

U.S. Heavy Oil Potential is 1,000,000 Barrels Per Day by 2005

ECONOMICS

High Conversion With Integrated Hydrotreating Said Most Economical for Upgrading

SYNTHETIC FUELS REPORT, DECEMBER 1992
IV. COAL

PROJECT ACTIVITIES

British Gas Wraps Up Operation of the BGL Gasifier
IGT MILDGAS Process to be Tested at 24 Tons Per Day
ENCOAL Project Moves to Operational Phase
Lakeside Project Will Highlight Combustion Engineering Gasifier
ThermoChem and K-Fuel Processes Pursue Joint Development
Combined Mild Gasification and PFBC Project Proposed for North Dakota
Cordero Mining Drops Carbondry Process
Pinon Pine Project to be First Commercial Test of KRW Process
Engineering of Wabash River Gasification Project to be Completed in 1993
Negotiations Completed for Air Products Coal-to-Methanol Project at Cool Water

CORPORATIONS

Energy and Environmental Research Center to Form Coal Briquetting Consortium

ECONOMICS

IGCC Plants Still Need Cost Reductions to be Competitive
Alaska Coal-Water Fuel Seen Competitive With Heavy Oil in Japan
TECHNOLOGY

Coal Gasified in Catalytic Draft-Tube Spouted Bed Reactor  
Pilot Tests of Carbonizer for PFBC Topping Cycle Proceeding Well  
Carbon Black From Coal Looks Feasible in Lab Tests  
Syngas From Shell Gasifier Shows Low Levels of Hazardous Pollutants  
Lignite-Derived Char Could Control Toxic Emissions From Waste Combustors  
Underground Gasification Proposed for Use in Developing Countries  
Tire Pyrolysis Oil Proves Unsuitable for Coal Liquefaction

INTERNATIONAL

SGI Reports Good Test Results With Southeast Asia Coals  
Sasol Expanding in the Chemicals Sector  
Demkolec IGCC Project at Buggenum to be Commissioned in 1993  
IGCC Under Consideration by Czech Power Company  
Japan May be Site for 50-Ton-Per-Day MRS Hydrogenation Demonstration  
Coal Gasification and Chemicals Conglomerate Formed in China

RESOURCE

IEA Says Coal Demand Will Increase 12 Percent by 2000

COAL PUBLICATIONS/PATENTS

STATUS OF COAL PROJECTS

INDEX OF COMPANY INTERESTS

V. NATURAL GAS

PROJECT ACTIVITIES

LNG Portion of Mossel Bay Syngas Project to Meet New Operating Requirements  
Public Service to Write Off Investment in Synhytech Plant

CORPORATIONS

Natural Gas Council Formed

GOVERNMENT

Tax Credit Expires for Coalbed Methane

STATUS OF NATURAL GAS PROJECTS
