Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company's experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.

CONTENTS

HIGHLIGHTS

I. GENERAL

CORPORATIONS
  IGT Highlights Research Efforts in Natural Gas and Coal Conversion

GOVERNMENT
  Clinton Administration Releases Domestic Oil and Gas Plan
  National Research Council Makes Recommendations for DOE Fossil Energy Research

ENERGY POLICY AND FORECASTS
  Battelle Forecasts Slight Increase in Overall R&D Spending for 1994
  United States Dependence On Oil Imports Continues to Climb
  World Energy Council Foresees Big Increases in Energy Demand By 2020
  Bechtel Sees Need for 100 GW of New U.S. Generating Capacity in Next 10 Years

ECONOMICS
  Attractive Subsidies are Available for Biomass Gasification

TECHNOLOGY
  New Small Business Innovation Research Projects Described

INTERNATIONAL
  Finnish Companies Making Progress in Pressurized Gasification
  Wood Gasifier Being Developed in Brazil

COMING EVENTS

II. OIL SHALE

PROJECT ACTIVITIES
  Little Change Reported on Status of Stuart Project

CORPORATIONS
  Ramex Gets Financing for Further Oil Shale Gasification Work

ECONOMICS
  Byproduct Market Possibilities Examined for Eastern Oil Shale

TECHNOLOGY
  New Opportunities Seen for High-Value Chemicals From Shale
  Recent Oil Shale Patents Listed
  Solar Gasification of Oil Shale Proposed
III. OIL SANDS

PROJECT ACTIVITIES
   Oil Sands Production Figures Updated
   Imperial Oil Defers Phases 9 and 10 at Cold Lake
   Shell Canada Testing SAGD Process at Peace River

CORPORATIONS
   Canadians to Pool Resources for Oil Sands R&D

GOVERNMENT
   Oil Sands Orders and Approvals Listed

TECHNOLOGY
   Recent Oil Sands Patents Listed
   In Situ Combustion in Canadian Heavy Oil Reservoirs Reviewed
   Supercritical Fluid Extraction of Oil Sand Bitumen Studied
   Steam-Assisted Gravity Drainage Becoming Proven Technology for Oil Sands and Heavy Oil

INTERNATIONAL
   Intevep Plans Heavy Crude Processing Plant
   Orimulsion Picks Up Support in Europe and Canada

RESOURCE
   Heavy Oil Potential in Alaska Studied

STATUS OF OIL SANDS PROJECTS

INDEX OF COMPANY INTERESTS
IV. COAL

PROJECT ACTIVITIES
ENCOAL Plant Starts Up Again
Advances Made in Shell-Based IGCC Plant Design
Groundbreaking Set for 2-Megawatt Molten Carbonate Fuel Cell
Great Plains Project Building Scrubbers for Coal Liquefaction Plant
Healy Clean Coal Project Hits Snag
TVA Cancels Work on Coproduction Power and Fertilizer Concept
Western Energy SynCoal Process May Find a Customer
Carbonate Fuel Cell Being Tested in Slipstream at Destec Gasification Facility

CORPORATIONS
Proof-of-Concept Liquefaction Facility Dedicated at HRI

GOVERNMENT
Status of Clean Coal Technology Projects Updated

ENERGY POLICY AND FORECASTS
$25 Billion in Gasification Projects Already Committed

ECONOMICS
MITRE Finds Direct Liquefaction More Economical Than Indirect
IGCASH Cycle Shows Promise for Intermediate Load Applications
Baseload Power Generation Technologies Compared By Black and Veatch

TECHNOLOGY
History of Dispersed Catalysts in Coal Liquefaction Reviewed
Hot-Gas Particulate Removal Systems Studied for IGCC Applications
Liquid Phase Methanol Attractive for Dispatchable Energy Storage
Lignite Overburden From Clay Mining Could Be Retorted
Air-Blown Versus Oxygen-Blown PRENFLOR Gasifiers Compared
Aromatic Polymer Precursors Could Provide a New Direction for Coal Chemicals

INTERNATIONAL
CRE Gasifier Developed for Topping Cycle
Gasification Projects Progressing in China
Puertollano IGCC Project to Be Operational in 1996
KoBra Project Using HTW Gasifier Scheduled for Commissioning in 1996
Buggenum IGCC Plant Ready for Demonstration

ENVIRONMENT
Fugitive Emissions at Cool Water Were Low
Environmental Impacts at Wabash River Gasification Project Addressed
Coal Agglomeration Process Cleans Up Tar at Gas Plant Sites

RESOURCE
U.S. Coal Production and Reserves Updated
Record United States Coal Production Forecast for 1994

STATUS OF COAL PROJECTS

INDEX OF COMPANY INTERESTS

SYNTHETIC FUELS REPORT, MARCH 1994
V. NATURAL GAS

TECHNOLOGY
DOE Contractors Report Progress in Natural Gas Conversion
New Methane Conversion Process Doubles Yield of C₂ Chemicals

INTERNATIONAL
China Makes Bid to Develop Coal-Bed Methane

RESOURCE
Forty Trillion Cubic Feet of Natural Gas Identified in Hydrates on Alaskan North Slope

STATUS OF NATURAL GAS PROJECTS
