Pace Synthetic Fuels Report is published by The Pace Consultants Inc., as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. Pace Synthetic Fuels Report is protected by the copyright laws of the United States; reproduction of any part of the publication requires the express permission of The Pace Consultants Inc.

The Pace Consultants Inc., has provided energy consulting and engineering services since 1955. The company's experience includes resource evaluation, process development and design, systems planning, marketing studies, licensor comparisons, environmental planning, and economic analysis. The Synthetic Fuels Analysis group prepares a variety of periodic and other reports analyzing developments in the energy field.

THE PACE CONSULTANTS INC.
SYNTHETIC FUELS ANALYSIS

MANAGING EDITOR

Jerry E. Sinor
Post Office Box 649
Niwot, Colorado 80544

CONTENTS

HIGHLIGHTS

I. GENERAL

GOVERNMENT
  DOE Issues New Strategic Plan Under Secretary O'Leary
  DOE 1995 Budget Request Shows Continued Shift in Priorities

ENERGY POLICY AND FORECASTS
  DOE Energy Facility Siting Study Sees Need for Massive New Infrastructure
  NERA Forecasts World Oil Consumption to Increase at 2 Percent per Year
  Americans Believe Imported Oil Carries Risks

TECHNOLOGY
  Texaco Gasifier Studied for Coproduction Role at Petroleum Refiners

INTERNATIONAL
  Finland's Enviropower Says Any Solid Fuel Can Be Gasified

ENVIRONMENT
  Carbon Storage in Halophytes Could Provide Global Warming Mitigation

COMING EVENTS

II. OIL SHALE

CORPORATIONS
  Southern Pacific Petroleum Annual Report Reviews Status of Stuart Project

GOVERNMENT
  National Oil Shale Database Has 500,000 Assays On File

TECHNOLOGY
  Schemes Described for Production of Chemicals From Oil Shale
  Model Developed for Asphaltene Associations in Shale Oil

INTERNATIONAL
  Petrobras 40-Year History Notes Oil Shale Developments
  Swedish Oil Shale Era Reviewed

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS
III. OIL SANDS

PROJECT ACTIVITIES

Sceptre Expands at Tangleflags
Electromagnetic Heating With Horizontal Well to Be Tested at Frog Lake
Four Heavy Oil Gasification Projects Under Way in Italy
Monitoring Program for Astra's UTF Project Described
Suncor Oil Sands Group Made Big Gains in 1993

CORPORATIONS

Heavy Oil Output at Murphy Oil Increased 39 Percent in 1993
California Synfuels Research Starts Heavy Oil Upgrading Study
Syncrude Stake Contributes to Record Earnings at Alberta Energy Company
Criterion Catalyst and Syncrude Form Alliance to Meet All of Syncrude's Catalyst Needs

GOVERNMENT

ERCB Reviews Year of Oil Sands Activities

TECHNOLOGY

ROSE Asphaltenes From Upgrading Bitumen Can Provide Gasification Feedstock
New Combustion Process Utilizes Horizontal Wells and Gravity Drainage
Rubberized Tar Sand Bitumen Makes New Product
Gasification Becoming an Important Route to Dispose of Heavy and Residual Oils
Steamflood Evaluated for Texas Gulf Coast Heavy Oil Reservoir
Automatic Speed Control System Developed for Heavy Oil Production
SAGD Process Found To Be Applicable to Wide Area in McMurray/Wabiskaw Deposit
Water Treatment Options Given for Use of Deep Aquifers to Generate Steam
University of Utah Oil Sands Research Program Updated
Horizontal Well Steamdrive in Arkansas Heavy Oil Reservoir Predicted to Cost $15 per Barrel

INTERNATIONAL

Electromagnetic Waves Reported to Increase Heavy Oil Production in Venezuela
Orimulsion On the Way to Japan

STATUS OF OIL SANDS PROJECTS

INDEX OF COMPANY INTERESTS

IV. COAL

PROJECT ACTIVITIES

Beneficiated Coal-Water Slurry Plant Started Up in Italy
Coal-Water Mixture Facility Completes First Year of Operation in Japan
Great Plains Decides on Ammonia-Based Scrubber
Pinon Pine Annual Report Reviews 1993 Accomplishments
Lawsuit Over Price for Great Plains Synthetic Pipeline Gas is Settled
Operations and Enhancements at Destec's 160-Megawatt Gasification Facility Updated

CORPORATIONS

First of GE's New 6FA Turbines to Be Used at Pinon Pine Project
Texaco Licenses 11th Gasification Project in China
IGT Forms Joint-Venture Company in China to Commercialize Coal Gasification
EPRI Heading Team to Develop New Gas Turbines

SYNTHETIC FUELS REPORT, JUNE 1994
HRI Demonstrates Highest Distillate Yields From Coal
Energy Research Corporation to Get 5-Year, $84-Million Funding for Fuel Cells
National Coal Council Issues Report on Clean Coal Technology for Sustainable Development

GOVERNMENT
New DOE Report Highlights Clean Coal Technology Successes

ENERGY POLICY AND FORECASTS
Background and Rationale for Continuation of Liquefaction Efforts Presented
Shell Reviews Future of Coal From a Global Perspective

ECONOMICS
Polk Power Station IGCC Project Will Cost $600 Million
Economics of Micronized Coal-Water Slurry for Industrial Boilers Not Favorable in Small Market
EPRI Sees IGCC as Still More Expensive Than Other Powerplant Options

TECHNOLOGY
Production of Materials and Chemicals From Coal Holds Promise
Liquefaction of Low-Rank Coals Could Lead to Specialty Chemicals
Briquetting of Coal Considered as an Upgrading Process
Diluted Syngas Yields Low NO\textsubscript{x} Emissions for IGCC Powerplants
Combination COREX/MIDR\textsubscript{EX} Process Offers Benefits for Ironmaking
Energy and Environmental Research Center Patents Liquefaction Process
Molten Caustic Leaching May Be Feasible at Low Caustic/Coal Ratios

INTERNATIONAL
Clean Coal to Draw Increased Interest in China

ENVIRONMENT
Coal Industry Announces Climate Plan Partnership With Department of Energy

STATUS OF COAL PROJECTS

INDEX OF COMPANY INTERESTS

V. NATURAL GAS

CORPORATIONS
Kentech to Build Gas Conversion Plant in China

ENERGY POLICY AND FORECASTS
Natural Gas to Be a Global Competitor

ECONOMICS
Plasma Quench Appears to Be Competitive With Other Gas Conversion Processes
Sasol Advances Make F-T Liquids From Gas Possible at $30,000 per Daily Barrel

TECHNOLOGY
Natural Gas Conversion to Liquids Reviewed
Water Injection Improves Activity and Yield of Oxidative Coupling Catalyst

STATUS OF NATURAL GAS PROJECTS
