the sinor synthetic fuels report

VOLUME 3 • NUMBER 2 • APRIL 1996

quarterly

J.E. SINOR CONSULTANTS INC.
THE SINOR SYNTHETIC FUELS REPORT is published by J.E. Sinor Consultants Inc. as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. THE SINOR SYNTHETIC FUELS REPORT is protected by the copyright laws of the United States. No part of the report may be copied, stored in an electronic data retrieval system, or transmitted to third parties unless expressly authorized by J.E. Sinor Consultants Inc.

We welcome your comments concerning THE SINOR SYNTHETIC FUELS REPORT.

J. E. Sinor Consultants Inc. has provided alternative energy consulting and reporting services since 1985. The company's experience includes resource evaluation, process development and design, technical evaluations, expert witness testimony, marketing studies, environmental planning, and economic analysis.

For additional information concerning company qualifications, capabilities and experience, please contact:

The Sinor Synthetic Fuels Report is published quarterly in January, April, July, and October by J.E. Sinor Consultants Inc., 6964 North 79th Street, Suite 1, Niwot, Colorado, USA 80544, (303) 652 2632.
CONTENTS

GENERAL

ENERGY POLICY AND FORECASTS
O'Leary Says U.S. Headed for Energy Crisis

ECONOMICS
Enviropower Sees High Potential for Biomass IGCC

TECHNOLOGY
Cogasification Upgrades Marginal Domestic Fuels
IGT Ends Fuel Cell Endurance Test After Two Years
Past Coal Research Shows the Way for Power Generation From Wastes
Coprocessing Coal and MSW Yields Liquid Fuel and Hydrogen

ENVIRONMENT
Early Cap On CO₂ Emissions Would Be as Effective as Stronger Measures Later

COMING EVENTS

OIL SHALE

ECONOMICS
Potential Shale Oil From Alpha Project Worth $159 Million

TECHNOLOGY
Oil Shale Extracted In High Yield With Near-Critical Water

INTERNATIONAL
Solvent Extraction of Bitumen Fraction of El-Lajjun Shale Tested
Solar Energy Could Be Used to Gasify German Oil Shale

ENVIRONMENT
Co-Combustion of Oil Shale and Solid Waste Makes Environmentally Benign Plant

OIL SANDS

CORPORATIONS
PDVSA Expects Orimulsion Output to Hit 5.3 million Tonnes In 1996
Orinoco Development Strategy Moves Forward With Large Joint Ventures
Fountain Oil Absorbs Electromagnetic Oil Recovery

GOVERNMENT
Heavy Oil/Enhanced Recovery/Oil Sands Database Available

TECHNOLOGY
Solv-Ex Patents Mineral Leaching Method for Oil Sands
Combustion Characteristics of Bitumen Emulsions Tested
Screw Pumps Successful In Pumping Orinoco Bitumen
Coprocessing With Coal Increases Light Oil Yields From Bitumen
Trona Could Replace Sodium Hydroxide In Hot Water Process

INTERNATIONAL
Orimulsion Becomes the "Fourth Fossil Fuel"
Orimulsion Transport Plan Gets Safety Approval
Britain Closes One Orimulsion-Burning Plant But Plans Others

THE SYNTHETIC FUELS REPORT, APRIL 1996
COAL

PROJECT ACTIVITIES
Great Plains Rallies Support for Major New Legal Challenge 55
Pion Pine Project On Track for Startup This Year 55
Nakoso 200-TPD IGCC Plant Onstream in Japan 56
Foster Wheeler Has Integrated Carbonizer/PFBC Pilot Plant 58
Great Plains Gasification Plant Again Considering Methanol Production 60

CORPORATIONS
Clean Coal Power Generation Group Outlines Research Program 62

ECONOMICS
Advanced Direct Liquefaction Concepts Could Lower Costs $4.64/Barrel 65

TECHNOLOGY
Liquid Carbon Monoxide Could Become Peak Shaving Fuel 67
Slurry Catalyst Tested In Exxon Direct Liquefaction Unit 68
Conversion of Low-Rank Coals to Liquid Fuels Reviewed 71
Steam Pretreatment Improves Coal Liquefaction Product Quality 72
Activated Char Finding Acceptance for Flue Gas Treatment 74
Tin Oxide Shows Promise for Desulfurization of Hot Coal Gas 76

INTERNATIONAL
Clean Coal Technology Receives Increasing Attention In China 78

ENVIRONMENT
IGCC Emission Factors Rated 81

NATURAL GAS

ECONOMICS
Slurry-Phase FT Process Could Increase Profit By $4 per Barrel 85
Methanol May Be Poised to Become a Power Generation Fuel 87

TECHNOLOGY
DME Has Potential to Become Major Synthetic Fuel From Natural Gas 90
Reforming Methane With CO₂ for Power Offers Possibility of Chemicals Coproduction 93

RESOURCE
NERA Forecasts Increasing Demand for Natural Gas In Industrial Sector 96
