the sinor synthetic fuels report

VOLUME 5  •  NUMBER 3  •  JULY 1998

quarterly

J.E. SINOR CONSULTANTS INC.
THE SINOR SYNTHETIC FUELS REPORT is published by J.E. Sinor Consultants Inc. as a multi-client service and is intended for the sole use of the clients or organizations affiliated with clients by virtue of a relationship equivalent to 51 percent or greater ownership. THE SINOR SYNTHETIC FUELS REPORT is protected by the copyright laws of the United States. No part of the report may be copied, stored in an electronic data retrieval system, or transmitted to third parties unless expressly authorized by J.E. Sinor Consultants Inc.

We welcome your comments concerning THE SINOR SYNTHETIC FUELS REPORT.

J. E. Sinor Consultants Inc. has provided alternative energy consulting and reporting services since 1985. The company’s experience includes resource evaluation, process development and design, technical evaluations, expert witness testimony, marketing studies, environmental planning, and economic analysis.

For additional information concerning company qualifications, capabilities and experience, please contact:

The Sinor Synthetic Fuels Report is published quarterly in January, April, July, and October by J.E. Sinor Consultants Inc., 6964 North 79th Street, Suite 1, Niwot, Colorado, USA 80544, (303) 652 2632.
CONTENTS

GENERAL

GOVERNMENT
  U.S. Department of Energy Proposes Technology Options to Reduce CO₂

ENERGY POLICY AND FORECASTS
  IPAA Forecasts U.S. Energy Growth Through 2010

ECONOMICS
  Electricity Deregulation May Offer New Markets for Fuel Providers

TECHNOLOGY
  Bimetallic Catalysts Increase Selectivity in F-T Reaction
  Model Assesses Role of Alkali Promotion in F-T Synthesis
  Carbon Catalysts Upgrade Liquid Bio-Fuels
  Study Favors DME Over Natural Gas and Methanol
  WOMBAT Process Converts Tires into Low-Polluting Fuel

ENVIRONMENT
  U.S. Global Change Research Program Releases 1999 Assessment

RESOURCE
  F-T Syncrudes Yield Exceptional Fuel Qualities
  Efficiency of Distribution Network Key to Global Methanol Marketing

COMING EVENTS

OIL SHALE

PROJECT ACTIVITIES
  Stuart Project 40 Percent Complete

CORPORATIONS
  Australian Shale Developers Eye $28 Billion Barrel Resource Base

TECHNOLOGY
  Cogeneration Using Shale Produces Efficient and Clean Energy
  One Percent Moisture Increases Oil Shale Yield by 20 Percent
  Fluidized Bed Combustion Test Unit Operating in Japan
  Catalysts Tested in Israeli Trickle Bed Reactor

RESOURCE
  Shale Resources in Turkey Assessed

OIL SANDS

PROJECT ACTIVITIES
  Orimulsion Wins Florida Go Ahead; Hits New Barrier
  Syncrude Greenlights $900 Million Aurora Mine Expansion
  Synshift/Synsat Unit Selected for Fort McMurray

CORPORATIONS
  Suncor Oil Sands Earnings Grow 9 Percent in 1997, Dip in Early 1998
  Suncor Sells 1 Million Tonnes of Petroleum Coke to Japan

TECHNOLOGY
  Mild Hydrotreating Stabilizes Synthetic Crude Oil
  Recovery Doubles: Cost Drops 30 Percent with SAGD Technology
  In Situ Bitumen Test Maps Effects of Steam on Oil Consumption
  Vapex Solvent Injection Process Recovers Oil Without Heat

THE SYNTHETIC FUELS REPORT, JULY 1998
Model Useful in Assessing Heat and Fluid Flow in Oil Recovery

WATER
Lithium Buildup Hampers Produced Water Use at Wolf Lake

RESOURCE
Canadian Oil Sands Production Up, Poised to Triple

COAL

PROJECT ACTIVITIES
100 MW IGCC Plant Opens at Piñon Pine
Sasol Plans Expansion of Secunda Plant

GOVERNMENT
U.S. Clean Coal Projects Moving Toward Completion
Coal Conversion a Centerpiece in Japan’s New Sunshine Program
U.S. Coal Test Center Opens
State of Ohio Awards $5.4 Million in Clean Coal Grants

TECHNOLOGY
Phosphomolybdic Acid Activates Catalyst in Coal Liquefaction
Coal Liquefaction Process Designed to Minimize Use of Solvent
Higher Reactor Gas Flow Found to Increase Liquefaction Yields
Hydriodic Acid and Microwaves Enhance Coal Liquefaction
Biomass Fractionation Applied to Coal Liquefaction
Hydrogenated Resid Makes Good Coal Liquefaction Solvent
Coke Oven Gas Cheap Hydrogen Source for Coal Liquefaction
Eutectic Salts Investigated As Gasification Catalysts
Hydroboration Process Simple Way to Upgrade Coal

ENVIRONMENT
Fate of Sulfur During Coal Pyrolysis Tracked

RESOURCE
Cavity Growth in In Situ Coal Gasification Modeled

NATURAL GAS

PROJECT ACTIVITIES
Wyoming 8,000 BPD Stretroleum GTL Project Launched
Norsk Hydro Proposes Natural Gas-to-Hydrogen Power Generation
Shell Begins Reconstruction of Malaysian GTL Plant

CORPORATIONS
Syntroleum Adds 16,500 Square Foot Research Laboratory
Chevron and Sasol Team to Build Nigerian Gas-to-Liquids Plant
Syntroleum Funds Research of Low-Cost Catalysts by Catalytica

GOVERNMENT
U.S. Department of Energy Supports Methane Hydrate Research

ECONOMICS
Economics of GTL Technology Ensures Boom, Predicts ADL

TECHNOLOGY
Case Study Presents History of Shell Middle Distillate Synthesis Process
Simultaneous Steam and CO₂ Reforming of Methane 99 Percent Efficient
Mega Methanol Synthesis Plants Can Produce 5,000 Metric Tons Per Day
Partial Oxidation of Methane Examined in Engineering Model
Catalytic Decomposition of Methane Attractive for Remote Hydrogen
Hydrates May Hold 320,000 TCF of U.S. Natural Gas Resources
